Yes to speeding problem		54	91.5%	Agree
No to speeding problem		5	8.5%	Disagree
Yes to 20mph Speed limit		45	76.3%	In favour
No to 20mph Speed Limit		14	23.7%	Opposed (with 4 returns "Don't know" or "Partially Agree")

DATA

Name?	Speeding Problem?	Severity	20mph Limit	Free Comments
	Yes	10	Yes	Continuing the pavement along North Street towards the Green
	Yes	10	Yes	We have lots of heavy traffic in North Street. Feed Lorries, Cattle lorries tractors and garden centre traffic. We need a pavement from Mays Close to the end of North Street before there is an accident.
	Yes	10	Yes	20mph can only be part of addressing the issue. Erosion of grass verges illustrating significant problem of speeding traffic where no footpaths. Need white lines on some stretches to encourage drivers to stay on the right side of the road.
	Yes	10	Yes	People parking on paths, also people parking opposite road entrance an peoples drives. Diverted mororway vehicles coming through Fritwell as if they are still on the motorway.
	Yes	10	Yes	North Street needs a path
	Yes	10	Yes	
	Yes	10	Yes	Parking on East Street between the old shop and crossroads needs urgent attention before someone gets injured or killed. Don't wait until that day.
	Yes	10	Yes	The potholes and road damage in Forge Place could this situation be looked into for urgent repair because of danger to the public, cyclists and damage to motor vehicles thank you
	Yes	10	Yes	Please do not forget Forge Place with speed limits. Vehicles always speeding down here. In our road we have children, elderly residents and animals all at risk. Thank you.
	Yes	10	Yes	There is a serious problem with large HGVs and traders speeding in North Street. Please note the state of the verges in North Street, mostly damaged by speeding large vehicles.
	Yes	10	No	Fewcott Road is like a speedway. Maybe a chicane as you come into the village by the white gates would slow down.
	Yes	9	Yes	Also Use traffic calming measures like large flower pots / planters
	Yes	9	Yes	Preferably <u>not</u> Speed Bumps
	Yes	9	No	Only physical engineered enforcement will be effective. This needs to involve traffic calming and/or speed humps as for Bucknell.
	Yes	9	Yes	If the limit is reduced to 20mph it doesn't guarantee that motorists that speed will slowdown. A speed gun prosecution or other calming measures may be necessary.
	Yes	9	Yes	
	Yes	9	Yes	We would prefer no speed bumps as they create noise in themselves, however a 20mph speed limit would help traffic slowdown. Thank you.
	Yes	8.5	Yes	A chicane at the gates of Souldern Road might stop traffic hurtling down the hill into the village with right of way for outgoing village traffic.
	Yes	8	Yes	Speeding is having a significant impact on the decimation of the verges in North Street with tractors and lorries going too fast not stopping and going over verges instead. You need to do something.
	Yes	8	Yes	A mini-roundabout at the East Street/North Street crossroads would slow down traffic approaching from all directions. A similar comment applies to the East Street/Fewcott Road junction.
	Yes	8	Yes	
	Yes	8	Yes	We desperately need a creative solution to on-street parking along East Street. PARKED CARS + SPEEDING CARS = MORE DANGEROUS
	Yes	8	Yes	Stop people parking on the pavements
	Yes	8	Yes	At least make sure the existing limits are enforced.
	Yes	8	No	Tractors on North Street are a real problem. Cars parked badly don't help, especially on the corner of Fewcott Road.
	Yes	8	Yes	
	Yes	8	Yes	
	Yes	8	Yes	Installing Speed ramps on the entrance roads to the village
	Yes	8	No	I have said no to 20mph because the people don't comply with 30mph. I think a Police presence would be more effective.
	Yes	8	Yes	
	Yes	8	Yes	We are heartily fed up with the sewage lorries going through the village and rattling our windows at all hours. Also, cars parked all over the pavement on East Street outside one house.
